

Resource Management: The Courts and the Environment 2003 - serious issues

INTRODUCTION

1. A REVIEW OF RECENT DECISIONS AND DEVELOPMENTS

Part II interpretation and matters of national importance

Approaches to Part II

Climate change and Part II

Taranaki and Auckland cases

Coastal space and marine farming

Midbay farms

Maori foreshore and seabed claims

Enforcement

Expressly recognised effects

Corporate sentencing

2. WHAT'S UNDER THE BASELINE?

Introduction

Origins of the "permitted baseline"

Case law

Activities permitted as of right

Does a resource consent constitute part of the permitted baseline?

Multiple consent applications

The effect of the Resource Management Amendment Act 2003

What is inside the baseline?

Issues arising out of the baseline approach

(i) Should controlled or discretionary activities be included in the permitted baseline?

Ohope

Glenfield Ratepayers and Residents Association

Kalkman

(ii) Unimplemented resource consents

(iii) Application to existing use rights

(iv) Resources other than land

(v) What role does Part II have in the permitted baseline assessment?

(vi) The intentions and interpretation of district plans

(vii) Application of the permitted baseline to plan changes and references

(viii) Resource Management Amendment Act 2003

(ix) Impact of permitted baseline on second generation plans

Where to from here for the permitted baseline?

3. PHANTOM ENVIRONMENTAL RISKS AND ENVIRONMENTAL DECISION-MAKING

Introduction

The Resource Management Act 1991 and environmental risk

Environment court and environmental risk

Risk management instruments - precaution

Methods for incorporating precautionary approach

Evidentiary burden on proponent

Categorisation of activities

Environmental standards

Adaptive risk management methods

Conclusion

4. BELIEF AND ENVIRONMENTAL DECISION-MAKING

Introduction

The transgenic cattle cases

Transgenic cattle 1: GMF98009

Transgenic cattle 2: GMD02028

The taniwha cases

Conclusions

5. THE ROLE OF THE EXPERT WITNESS

Introduction – the Environment Court and the expert

Expert evidence

The obligations of the expert

Role of counsel and related obligations

Role of counsel vis à vis the Court

Role of counsel vis à vis the expert witness

Role of counsel vis à vis the client

Briefing the expert witness

Instructing the witness

Counsel's influence on the form and content of expert evidence

Counsel must understand the evidence

The need for balance

Background material – justifying the evidence

Preparing the witness for cross-examination

Cross-examination

Preparing for and conducting cross-examination

The role of the court

Approach to rejecting evidence

Material not before the hearing

Procedure for written briefs – should evidence be read aloud?

Court's role in ensuring relevance
